

THE "TECH" IN THE FINTECH ECOSYSTEM

The Fintech Lending OPERATING SYSTEM

Digital lending has been expanding at a blistering rate. To keep pace with such dynamic growth, online marketplace lenders are on a reconnaissance mission for cutting-edge technology to assist them with all aspects of the lending, from loan origination and regulatory compliance to servicing and portfolio management.

LendFoundry is an accelerator for digital lending, providing end-to-end lending solutions covering loan origination, marketing, acquisition, underwriting, loan servicing and beyond.

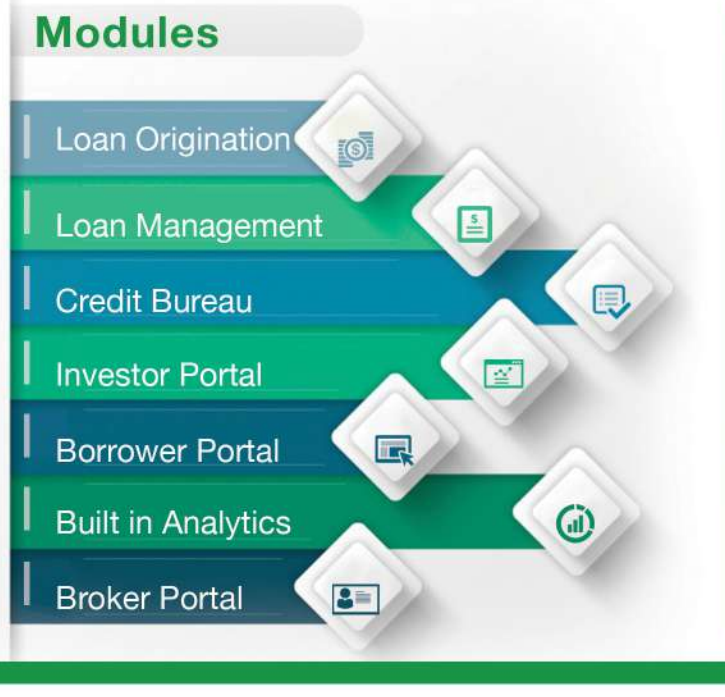

Welcome to LendFoundry: The Fintech OS

The LendFoundry operating system empowers marketplace lenders to bypass costly tech build-outs, minimize IT infrastructure, and accelerate growth.

LendFoundry provides all of the tools lenders need to be successful, including many built-in accelerators such as the Loan Origination System (LOS) and the Loan Management System (LMS). The LOS tracks a loan from application to funding, while the LMS tracks funding to servicing cycles. Along with these core functions, LendFoundry accelerators facilitate customer management, compliance reporting, authentication & security, marketing, and enable retrieval of all loan details through a unified search function.

Built to serve digital lending, LendFoundry is now the trusted platform of choice, from start-ups to enterprises, including some of today's largest online digital lending companies.

LendFoundry's Edge

- Scalability** - By rendering the platform on cloud which can be easily scaled to suit the varying needs of clients.
- Simplicity** - Through pre-packaged integrations with credit bureaus, bank data providers, document handlers and marketing applications.
- Intelligence** - With built in analytics engine which assesses credit worthiness while churning data from multitude sources.
